

We are looking for **precision optician** (m/w/d)

The dopa GmbH is an innovative, globally active Berlin-based company specializing in tool and process development for the precision optics, semiconductor and automotive industries.

YOUR TASKS:

- Faceting of semi-finished products
- Lapping, grinding and polishing on single and double-sided machines
- Testing and measuring of optical components with special measuring technology
- Further development of the processing and production of crystalline materials
- Standard-compliant assessment of optical components and their ISO-compliant documentation
- Incoming and outgoing goods inspection

YOUR PROFILE:

- Completed vocational training in the optical/precision optics field, alternatively as an industrial mechanic, machining mechanic, precision mechanic or mechatronics engineer
- A minimum of two years of optical experience
- Effective communication and interpersonal skills
- Excellent organizational skills and attention to detail
- A proactive, problem-solving mindset
- A desire to learn and grow in a dynamic manufacturing environment.
- Fluent in German (written and oral)

WHY JOIN US?

- **Make a Difference:** Be part of a team dedicated to improving lives through better optical products
- **Career Development:** Benefit from continuous training and development opportunities to enhance your skills within a dynamic company that prioritizes your professional advancement.
- **Supportive Team:** Work in a collaborative environment that values your contributions.
- **Advanced Technology:** Utilize the latest tools and equipment in optical industry
- Flexible working hours with 38 hours/ week
- Permanent employment contract with attractive remuneration
- 28 vacation days plus flexitime
- Cafeteria with roof terrace, subsidized lunch menu and free drinks
- Modern and clean working environment
