

We are looking for a Service & Commissioning Technician (m/f/d)

dopa GmbH is an innovative, internationally operating company based in Berlin, specializing in tool and process development for the precision optics, semiconductor and automotive industries.

To strengthen our team, we are looking for you!

YOUR PROFIL:

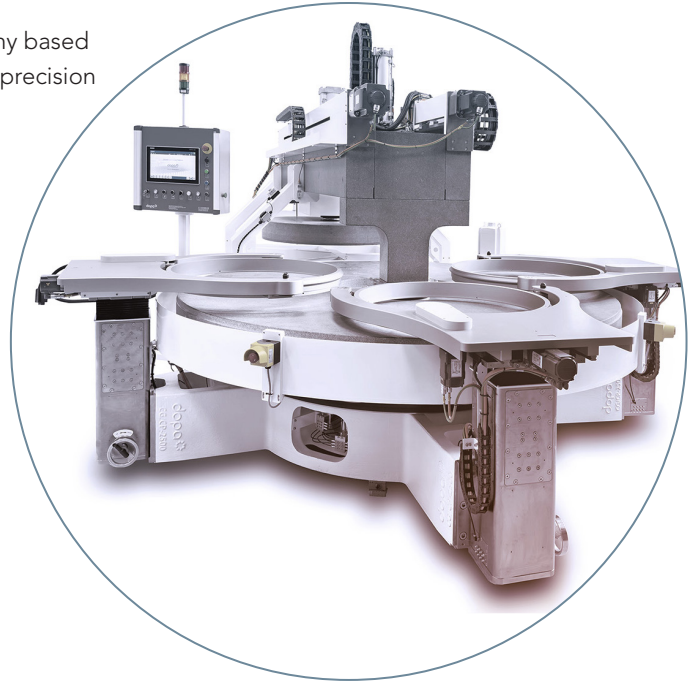

- Completed vocational training as a mechatronics technician, industrial mechanic, industrial electrician or a comparable qualification
- Experience in the maintenance, servicing and repair of automated production equipment
- Knowledge of PLC technology (S5/S7) is an advantage
- Very good German and good English skills
- Willingness to travel worldwide
- Strong analytical skills
- Ability to work both independently and as part of a team

YOUR RESPONSIBILITY:

- Commissioning machines at customer sites worldwide and at our own facilities
- Maintenance and servicing of production equipment and machine tools worldwide
- Supporting the assembly of new machines and systems
- Supporting our development team

WHAT WE OFFER:

- Flexible working hours and flexitime based on a 38-hour week
- Permanent employment contract with attractive compensation
- 28 days of annual leave plus additional flexitime days
- Cafeteria with rooftop terrace, subsidized lunches and complimentary beverages
- Modern and clean working environment
- Open and welcoming company culture
- Attractive professional development and training opportunities
- Company and team events
- Good public transport connections

Interested in joining us? We look forward to receiving your application. A detailed cover letter is not essential to us. Your CV together with a meaningful portfolio is equally welcome. We would also be pleased to know your earliest possible starting date.
